CLOSED LOOP RPM CONTROL

3114-CLR3-000*

System Description

The AQ Flow Controller incorporates a flow regulator and mechanical flow meter to sense the air flow rate to the Autoquip Air Engine. Should the load change on the air engine shaft, the Autoquip AQ Flow Controller adjusts the pressure to maintain a constant RPM.

Mechanical RPM Display

The Autoquip Mechanical RPM Display provides continuous indication of real time agitation speed. This inexpensive very readable display can be remotely mounted in a convenient eye level position, does not require batteries, or any special installation requirements.
