

The Autoquip Pressure Pot Lift System is designed to aid the operator in the back breaking pressure pot refilling process. This system eliminates placing the pressure pot lid on the floor where it can get damaged and create a large hazardous mess to clean up. Effortless and safely refill the pot tank while the lid is up and out of the way. System can be outfitted with an Autoquip Piston Air Engine which greatly reduces compressed air consumption.

### FEATURES & BENEFITS

- Free standing or fixed mount base
- Reduces worker fatigue
- Improves worker safety
- Reduces lid and prop damage
- Easier clean up of the prop and pickup
- Works with 5 & 10 gallon pressure pots
- Works with load cell systems
- Can be retrofitted with other air engines
- Ergonomically friendly
- Reduces messy floor clean up
